

THE CAPITAL OF HANSÁG: KAPUVÁR

The „healing water”

The thermal water of 67 °C of Kapuvár, which is qualified as medicinal water, is – according to experts – top quality water in Hungary, the most acknowledged after Hévíz.

The water of the thermal well is alkaline hydrogen carbonate and chloride thermal water containing dissolved salt in large volumes (14337 mg/l), and due to its content of iodide and sulphide ion, it can be classified as iodiferous and sulphide thermal water. Besides, the water contains significant concentration of bromide, fluoride, lithium and metasilicic acid.

The medicinal water is recommended for the treatment of the following disorders:

Post-traumatic disorders, chronic gynaecological diseases, chronic bronchitis, bronchiectasis, bronchial asthma, degenerative articular deformations, degenerative spine and disk disorders, chronic diseases of the respiratory system.

Applicable therapies: bath cure therapy, inhalation therapy.

Health of the body and the soul from the thermal spring. Take advantage of the services!

Accommodations: FLÓRA THERMAL BATH and Apartment Park
Hany Istók Cycling Centre
